

Million Bells Calibrachoa

Grows Like Wild!

That means you'll sell more volume per year. How do they do it?

Suntory bedding plants are the result of a unique crossing of propagated seed hybrids and a super-vigorous wild strain discovered by Suntory breeders. These far-superior varieties not only grow faster, they also give you a consistent, near perfect success rate.

Faster turnaround and higher yield – now that's a winning combination! And retailers love Suntory varieties in their stores because they hold their blooms so much longer than others. All of which means that with Suntory, your sales will grow like wild, too!

Suntory, first in innovation brings you:

- The first calibrachoa – now in 21 customer-pleasing colors!
- The first vegetative petunia, viola, and nierembergia
- The first disease-resistant verbenas
- More varieties and brilliant colors to choose from, including 21 new introductions this year!

Plugs, Cuttings, Liners, Bare Root

SUCCESS IS IN THE ROOTS.

Long-lasting Perennials that bloom the first year.

You have to dig deep to find Perennials as well-grounded as Speedling's first-year bloomers. From a rich history in growing, our vegetative and seed-propagated plants burst to life with robust, well-established root systems you can finish and "turn" with confidence. With a multitude of new and classic varieties, your customers will be Perennially happier. And you thought our success was an Annual thing.
